\$228M
awarded to
210
colleges
and universities—
including
67
grants to Minority-
Serving Institutions—
in support of
3,348
women since 1989

SHIFTING Narratives · DRIVING Change

CBL awards grants to institutions through an annual competition in three distinct areas:

- undergraduate scholarships and research awards
- graduate fellowships
- professorships

The most significant private funder of women in STEM in higher education in the United States.

“ Being a CBL Scholar gifted me choice and contributed to my confidence to take agency in my exploration, and to say yes to wild, challenging tasks that have made me the person I am today. ”

FORMER UNDERGRADUATE
SCHOLAR, KALAMAZOO COLLEGE

Ambassador Clare Boothe Luce established the CBL Program with her bequest to “encourage women to enter, study, graduate, and teach” in STEM fields where there have been barriers to their advancement. Today, CBL supports women from diverse backgrounds in STEM disciplines where women are least well-represented.
